EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Marcus Simon on September 19, 2005.

The application has been amended as follows:

IN THE SPECIFICATION:

Page 1, line 4, after "2002", --now abandoned-- has been inserted.

IN THE CLAIMS:

Claims 30-46 have been cancelled.

Claims 1 and 19, line 11, "such that" has been changed to --to position the support member in a first position in which--.

Claims 1 and 19, lines 11 and 13, "of the support member" has been changed to --thereof--.

Claims 1 and 19, line 12, "and" has been changed to --, and each support module--.

Claim 1, line 13, "such that" has been changed to --to position the support member in a second position in which--

Claims 2 and 20, line 4, "projection" has been changed to --projecting--.

Art Unit: 3634

Claims 2 and 20, lines 5-6, "such that the first longitudinal axis of the support member is approximately aligned with the second longitudinal axis of the main support" has been changed to --to position the support member in the first position--.

Claims 3, 6, 21, and 24, lines 4-5, 9-11, 4-5, and 9-11 respectively, "such that the first longitudinal axis of the support member is approximately orthogonal to the second longitudinal axis of the main support" has been changed to --to position the support member in the second position--.

Claims 6 and 24, lines 5-6, "such that the first longitudinal axis of the support member is approximately aligned with the second longitudinal axis of the main support" has been changed to --to position the support member in the first position; and--.

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance of claims 1 and 19 is the inclusion of each support module removeably coupleable with the coupling members to position the support member in a first position in which the longitudinal axis of the support member is aligned with a second longitudinal axis of the main support, and each support module removeably coupleable with the coupling members to position the support member in a second position in which the longitudinal axis of the support member is orthogonal to the second longitudinal axis of the main support. For claim 11, it is the inclusion of the support arm attached to the support member proximate its distal end, the proximal end of the support member being removeably coupleable with the first or second coupling member to position the support member in a first position that is aligned with the main support, and the engagement arm of each support module attached to the support member and

Art Unit: 3634

being removeably coupleable with the corresponding coupling member to position the support member in a *second position* that is *orthogonal* to the main support. For claim 26, it is the inclusion of the method steps requiring stabilizing the ladder using the support modules and decoupling the support modules from the coupling members while the main support is still coupled to the ladder, after the support modules have been removeably coupled to coupling members by means of the projecting portion of the support member. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hugh B. Thompson II whose telephone number is (571) 272-6837. The examiner can normally be reached on Monday thru Friday 9 am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Chilcot can be reached on (571) 272-6777. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/734,736
